

## **Notes**

I asked Caroline Cunningham for some assistance in finding some information on Paul Scheel, regarding blood transfusion during the 19th century in England. She sent me the following links and information that is listed below in an email.

<https://www.aabb.org/news-resources/resources/transfusion-medicine/highlights-of-transfusion-medicine-history#:~:text=1873%2D1880%20US%20physicians%20transfuse,A%2C%20B%2C%20and%20C.>

<https://pubmed.ncbi.nlm.nih.gov/30461135/>

[https://en.wikipedia.org/wiki/James\\_Blundell\\_\(physician\)](https://en.wikipedia.org/wiki/James_Blundell_(physician))

I couldn't find info about Paul Schell but I found these other doctors from the 1800s that were involved with blood transfusions. Samuel Armstrong Lane and James Blundell

## **Further Conclusions**

I would consider taking this research further to the next step by reviewing Charles Drew's Dissertation again, mostly the bibliography section that mentions where he learned about Paul Scheel. Also consulting some primary sources from that time frame such as any newspapers or conference proceedings that document his attempt in blood transfusion.
